**(1)** 10min value corresponding to EN50160. The calculation of the 10-min value shall comply with the 10min aggregation of EN  
 EN61000-4-30, class S. The function shall be based on the calculation of the square root of the arithmetic mean of the squared input values over 10min. In deviation from EN61000-4-30 a moving window shall be used. The calculation of a new 10min value at least every 3s is sufficient.

**(2)** Disconnecting time needs to be adjustable to meet requirement of LVRT and HVRT function
